Thanks Doug.....also the Notice of Adoption to our revisions to Part 5 to incorporate the outstanding federal rules (except the RTCR), was published in the NY State Register on Wednesday!. We are in the process on now getting our Attorney General Certification so that we can send the final primacy package to you. We are expecting that the RTCR revisions should be coming our for "Comment" in the next State Register notice starting the clock for this last rule.

If I don't hear from you next week I will know why.....good luck to all of our federal colleagues and hope your weekend is not too long!

Thanks

Roger

Hi,

I meant to circle back with you and apologize for not doing so sooner. Nothing new was presented and/or discussed. EPA is negotiating a judicial consent decree schedule with NYC for the Hillview cover. The current projections go into 2040 with a total price tag of around \$3 billion. NYC also raised your Drinking Water Council and the possibility of NYS regulating PFAS and 1,4-dichlorobenzene. NYC indicated that the federal MCL process would require a cost/benefit analysis, where the NYS process might not. NYC recently reached out to our RA for a meeting to discuss several issues, mostly non-drinking water issues, but they included Hillview. I will keep you posted on further developments. Hope you all have a nice weekend. Please let me know if you have any questions and/or wishto discuss further. This offer may expire at 11:59 today...

Tx-Doug

Thanks. Anything on the Council that NYC might claim would impact the requirement to cover Hillview?

Hi Doug,

The current focus of the drinking water quality council (DWQC) is to develop recommendations to the DOH for MCLs on PFOA, PFOS and 1,4-dioxane. Not sure any of these particularly impact NYC, so it is curious that they have it on the agenda. It may be that they are looking forward to something beyond these first tasks, if things go well the council will have recommendations by the spring and will be looking for new tasks then. There is no shortage of potential tasks. Microcystin/HABs is one potential. You should also know that Steve Schindler is a member of the DWQC.

Hi,

Paul Rush and company are heading to EPA-HQ on 1/9 to discuss Hillview. I found out today they added a topic on the NYS Drinking Water Council. Do you have any updates or information on the council as it relates to NYC? Thanks as always!
